Education & Technical Skills

Cornell University | Ithaca, New York — Expected May 2026
Master of Professional Studies in Information Science | Cumulative GPA: **3.87**

Purdue University | West Lafayette, Indiana — Graduated Fall 2024
Bachelor of Science in Computer Information Technology, System Analysis & Design
Management Minor | Cumulative GPA: **3.42** | Major GPA: **3.72**

Languages: Bash, Python, R, SQL
Data & Analytics: Database Design and Management, ELT, ETL, Hadoop, Hive, IBM SPSS, PowerBI, Tableau
Databases, Platforms & Systems: PostgreSQL, SQLite, MySQL, Oracle SQL, MongoDB, VMware, Linux

Professional Experience

Industry Partnership Project | Riverside Company — 09.2025 – 12.2025
Data Engineer Lead & Quantitative Analyst — Ithaca, New York, U.S

- Built **Python** data **pipeline**; performed **EDA** on **200+** investments to analyze correlation between operating targets and IRR
- Conducted trend analysis and momentum decay analysis on portfolio performance
- Identified **~40–50%** early underperformance as predictor of negative returns
- Built **Tableau** dashboard to track IRR trends and portfolio performance signals

Memory Business Device Solution Internship | Samsung Electronics — 06.2024 – 08.2024
NAND Memory Analyst — Hwaseong, South Korea

- Proposed approach to reduce SSD NAND flash blast radius; estimated up to **90%** potential impact reduction
- Researched data integrity strategies; suggested per-user data tagging and storage across separate flash chip
- Analyzed single-die failure risk; proposed design to isolate failures and reduce user impact

CES Convention | Lotte Data Communication & CALIVERSE — 01.2023, 01.2024
Conference Assistant — Las Vegas, Nevada, U.S.

- Demonstrated company Metaverse platform technologies to attendees; supported engagement for **18,000+** visitors
- Coordinated event logistics including stage setup, VIP meetings, and tours; supported planning using **Excel** and **Word**

Selected Projects

RETAIL INVENTORY DATA WAREHOUSE & ETL PIPELINE
*Designed an end-to-end **ETL/ELT** pipeline using **Python** and **SQL** to transform raw grocery inventory data into a star-schema data warehouse, building staging, dimension, and fact tables to support inventory optimization and supplier analysis for **Tableau** reporting.*

INVENTORY DEMAND FORECASTING & REORDER OPTIMIZATION
*Extended the analytics-ready warehouse from the **ETL** project to develop scalable demand **forecasting** and reorder optimization workflows using **Python**, and **SQL**. Designed the pipeline to support machine-learning-driven inventory planning and future model development, with outputs consumable by **Tableau** dashboards.*

POLYTECH DESIGN & INNOVATION CONTEST
*Designed and programmed a prototype utilizing **Raspberry Pi** with its camera to capture and analyze users' joint movements during exercise squats, providing real-time feedback on form accuracy and user-friendly fitness tracking solutions. Project was **awarded 2nd** place at Purdue's Polytech Design & Innovation Contest.*

Certifications & Extracurricular Activity

IBM-Applied Artificial Intelligence (AI) Specialization Certificate — 01.2024
IBM-Python for Data Science, AI & Development Course Certificate — 11.2023

Wolf Park Volunteer Activities— Volunteer — 08.2023
Purdue Korean Association — Member — 08.2019
